## Professional Summary

I'm an AI-driven full-stack developer who combines modern engineering practices with AI-assisted workflows to ship production-grade web applications faster without compromising on code quality or stability. From real-time dashboards to payroll and attendance systems, I focus on building solutions that stay reliable long after launch.

## Professional Experience

### Nayoda

*Full Stack Development Intern*

Remote

*3 Month Internship*

- Developed real-time features using WebSockets/Socket.io for live client-backend updates
- Integrated a payment processing workflow, handling secure transactions via REST APIs
- Implemented Role-Based Access Control (RBAC) across backend endpoints
- Designed and optimized MongoDB schemas for real-time and transactional data

## Technical Skills

**Languages:** JavaScript (ES6+), HTML5, CSS3

**AI/GenAI:** Gemini API, Prompt Engineering, LLM Integration

**Frontend:** React.js, Next.js, Tailwind CSS

**Backend:** Node.js, Express.js, NestJS, RESTful APIs, MVC Architecture

**Databases:** MongoDB, Mongoose, MySQL, PostgreSQL, Prisma

**Auth & Security:** JWT, HTTP-only Cookies, bcrypt, RBAC

**Tools & DevOps:** Git, GitHub, Docker, Postman, Cloudinary, Stripe, Vercel, Render, CI/CD (GitHub Actions), Jest

**CS Fundamentals:** Data Structures & Algorithms, OOP

## Projects

**SOL India** | *IoT-Enabled Attendance & Production Management System*

*Live Client Product*

- Designed and shipped a production workforce management platform (NestJS, Prisma, PostgreSQL, React) for a live client, automating attendance, production tracking, and payroll
- Integrated a biometric face-recognition terminal via the ADMS hardware protocol, eliminating manual attendance entry
- Built an automated payroll engine with RBAC and PDF payslips, deployed on a cloud VM with CI/CD – continuously upgraded from live client feedback

**SkillSphere** | *Hyperlocal freelance ecosystem*

- Built a full-stack MERN platform connecting clients with local freelancers, enabling verified professional discovery and portfolios
- Integrated an AI-powered job matching engine recommending freelancers based on project requirements and profiles
- Implemented milestone-based secure payments and a reputation scoring system with real-time collaboration tools

**ShadowLearn** | *MERN stack, Cloudinary, JWT* | GitHub

- Built and deployed a knowledge-sharing platform for recording workflows and structured problem-solving logs, tested with 20 users
- Implemented secure JWT authentication with protected routes and RBAC, reducing unauthorized access to zero in testing
- Engineered optimized REST APIs for video upload/retrieval, achieving sub-300ms response times via Cloudinary CDN

## Education

**KCC Institute of Technology and Management**

Greater Noida, UP

*Bachelor of Technology in Computer Science*

*Aug 2023 – May 2027 (Expected)*

- Relevant Coursework: Data Structures & Algorithms, DBMS, Operating Systems, OOP

## Achievements & Activities

**LeetCode and HackerRank:** Solved 150+ problems covering Arrays, Linked Lists, Stacks. (leetcode.com/u/Aman-singh-01)

**Code-a-thon:** Participated in competitive coding events, collaborating under time-constrained environments

**Self-Learning:** Continuously learning new technologies and system design concepts through hands-on projects
